

Press Release 01/2020 – New from BESSEY: One-handed clamp EZ series

Something for everyone

The high-quality one-handed clamps from BESSEY are now available with an additional option: In addition to EHZ, EZS and DUO, craftsmen can choose from four sizes and a total of ten variants within the new EZ series for a wide range of applications. This gives professionals and DIY enthusiasts even more choice to find their ideal tool when their second hand is to be kept free.

Large selection

The new EZ series of one-handed clamps from BESSEY offers users an impressively wide range. It comprises of four sizes S, M, L and XL with a total of ten variants that can both clamp and spread. With opening widths from 110 mm to 900 mm, spreading widths from 80 mm to 1,090 mm and clamping forces from 200 to 2,700 N, the EZ series covers an enormous range of applications. Whether light handicraft work or heavy gluing work has to be accomplished overhead work is pending or a hand is needed to align the workpiece – with the EZ clamps this is possible without any problems.

Practical convenience

Ergonomics and practical comfort were also in the focus of the development of the new one-hand clamps series: The high quality 2-component plastic handle with pump lever behind the rail allows safe access from both directions. And thanks to the release lever integrated in the handle, the sliding arm can be quickly adjusted and the clamp released. With the three larger versions M, L and XL, the upper part can even be changed from clamping to spreading without the need for tools – the pushbutton release mechanism makes this possible. The large, soft protective caps also protect sensitive surfaces. A crossed v-groove is also integrated into the caps for secure fixing of round, pointed and angular parts.

Robust design

Modern aesthetics meets longevity: For the new EZ series, high-quality materials such as glass fibre-reinforced polyamide for the upper and lower part and tempered and burnished steel for the profiled rail were used. The plastic housing also protects the handle mechanism from dust and splintering.

*At BESSEY, we have a long tradition of producing **innovative, practical product solutions**. Since the cold drawn steel plant was founded in Stuttgart in 1889, the Bietigheim-Bissingen based company continues to raise the bar in clamping and cutting technology. Currently offering more than 1,600 products, BESSEY has a specific solution for practically every application. Our focus is on precision and durability, convenience and safety. **“To stop improving is to stop being good.”** This was the motto of company founder Max Bessey and it remains our guiding principle today – in all that we do and produce. This means that we are constantly developing new products and improving existing ones to make the user's life easier, on the basis of innovative ideas. Such innovations are worthwhile.*
